— WELCOME MESSAGE

Dear Colleagues,

We are most delighted to invite you all to the 11th AORTIC ASIA, which will be held on 21 – 22 June 2024 at Hyatt Regency Hong Kong.

The coming Aortic Asia in Hong Kong will offer a vital platform for Aortic specialists in Asia to exchange knowledge and insights regarding the treatment of aortic disease. By leveraging advancements in technology and adopting a multi-disciplinary approach, healthcare professionals can enhance patient care and optimize treatment outcomes. The meeting will involve extensive discussions and collaborations within the Asian Aortic focus group to contribute to the collective understanding of best practices in addressing various aspects of aortic disease. Over the past decade, despite the challenges posed by patients who are elderly and have multiple co-morbidities, significant advancements in technology and the introduction of innovative designs have transformed the landscape of aortic interventions, resulting in improved patient outcomes.

There has been a surge of new devices and evolving technologies in recent years, we hope the coming Aortic Asia can continue to convene and exchange collective data and experiences from Asia, in order to determine the most effective methods for treating patients that lead to durable long-term outcomes. Key topics of interest include sharing lessons learned from consensus opinions on approaches to aortic arch interventions, management of acute and chronic aortic dissection, factors governing the needs of secondary interventions for aortic disease, complex aneurysms, mycotic aneurysms, and the management of endoleaks.

We are sure it is going to be a rewarding and enjoyable event. We look forward to welcoming you in Hong Kong.
